

Poster Presentations

Each poster board has a height of 210 cm and a width of 90 cm. The poster number will be shown at the upper left of the board. You may only put up your poster on the day of your own poster session. Pushpins are provided on site. Please remove your poster soon after the end of your own poster session.

Oral Presentations

Oral presentations will be given by using the presenters' own computers connected to our LCD projectors with standard *mini-D-sub 15-pin* cables. Please bring a necessary VGA adapter if your computer is an ultrathin Windows notebook computer or a Mac. Because you should operate the computer by yourself, please make sure to familiarize yourself with your computer, e.g., how to display your computer screen on a projector. Please test your computer's connection with the projector during breaks. To avoid battery troubles, it is recommended that you should use your AC adapter to deliver AC power to your computer during presentation. The electrical outlets are available in all the lecture rooms. Please use 100 V, A-type plugs.

(Caution!)

An overhead projector will NOT be available for presentation.
